# LAUFEN – THE COMPANY

LAUFEN stands  
for swissness,  
quality and design,  
offering complete  
bathroom  
solutions around  
the world.

## Making the bathroom a living environment

The personality of this highly traditional Swiss brand reflects a symbiosis of design, quality and functionality. LAUFEN is one of the world's leading manufacturers with a global distribution network. The company's core competence is its knowledge in the area of sanitary ware manufacturing. For over 125 years, the LAUFEN brand has been using the oldest malleable material known to man to make innovative sanitary products in state-of-the-art plants with legendary Swiss precision. Knowledge of the bathroom as a whole is developed from the competence of LAUFEN in ceramics manufacturing, and sophisticated design.

### BATHROOM CULTURE FOR 125 YEARS

What makes LAUFEN products unique at first glance is that their Swiss design unites two major design trends: emotional Italian design from the south and the

northern tradition of design precision and clarity. For LAUFEN, quality has two aspects: manufacturing knowledge and high degree of practical benefit that the finished bathroom affords the customer – which is often not immediately apparent. LAUFEN, a Swiss company manufacturing products that allow water, a precious resource, to be used sparingly, demonstrates in this manner a commitment to preserving natural resources and environmentally-friendly production.

THE CANTON OF BASELSTADT AND BASELSTADT  
RIVERS DOUBS AND RHINE

## From humble beginnings to today's global player

When LAUFEN was founded in Switzerland in 1892, sanitation was still a far cry from the standards and comforts offered today; standards, which were particularly influenced by LAUFEN, the only sanitary ceramics producer that manufactures exclusively in Europe.

FIRST MECHANICAL FACTORY FOR SANITARY  
WARE ON THE EUROPEAN CONTINENT,  
ZNOJMO

Some of the production facilities that belong to the company today can be traced back even further into history.

In 1878 for example, the pioneer in the mechanical manufacture of sanitary ceramics was a production site belonging to the Austrian monarchy. It is not just tradition, but also the strong anchor which various European manufacturing sites maintain in their domestic markets, Switzerland, Austria and Czech Republic, that underpin the quality of LAUFEN as a company. LAUFEN's goal then was the same as today's: to lead on technology, service and design.

Back in the 1980s, LAUFEN engineers invented the most efficient high-pressure casting technology for ceramic production and therefore ensured a sustainable breakthrough in industrial production.

DEVELOPMENT OF THE WALL HUNG TOILET BY  
LAUFEN ENGINEER XAVER JERMANN, 1964

Just as important at LAUFEN are the constant developments in design: wall-mounted WCs and floor-standing washbasins have enabled a new sense of aesthetics. In 2013 LAUFEN's worldwide material innovation SaphirKeramik succeeded in revolutionising the design language of ceramic.

The innovative and valuable SaphirKeramik formulation gives the starting material unprecedented possibilities and scopes. SaphirKeramik is used when a design includes thin walled shapes and tight radii.

THIRD GENERATION SAPHIRKERAMIK WITH A  
DESIGN BY PATRICIA URQUIOLA

## A building of great symbolic value

**THE LAUFEN FORUM IS A 6,500 CUBIC METER ARCHITECTURAL STATEMENT, A VISITOR AND PRESENTATION CENTRE DESIGNED BY BASEL BASED ARCHITECTS NISSEN & WENTZLAFF, PHOTOGRAPHED BY MAURIZIO MERCATO.**

LAUFEN is synonymous with perfection in terms of form and craftsmanship and for advanced technology with an unobtrusive face. LAUFEN's headquarters in the conton of Basel-land reflect this identity.

Ludovica + Roberto Palomba designed "bowl / 08", a washbasin for the Palomba Collection. Architects Nissen & Wentzlauff then created a larger version of this object in the form of the building which stands out with its impressive exposed concrete and elegant statics.

An inventive spirit and desire for technical innovation are also part of the building's concept and require efficient resource usage and an acceptable ecological footprint. As a result, the multi-award-winning building is an outstanding feature in the Basel area, an area which is rich in superb architecture.

With the Forum, LAUFEN has created a new architectural setting for its products: it is a comprehensive architectural statement in concrete with the bathroom at its centre and acknowledges Switzerland unequivocally as the company's headquarters and production site.

A space for the bathroom with the power to inspire clients, architects, retailers and tradesmen alike as well as providing a source of information. This is also the home of the training centre of LAUFEN Bathrooms AG.

A wide range of seminars is held here to train groups and communicate product knowledge.

LAUFEN won the "Award for Mar-

keting + Architecture" in the category "Office and commercial buildings - industrial and commercial interiors" in 2010. It also won the "Green Good Design" award and, in 2011, the "best architects award 2011" in the category "Business and Industrial Buildings".

## A new kind of creative space

**TRAINING CENTRE AND CREATIVE SPACE MADRID - DESIGN BY PATRICIA URQUIOLA**

In 2016, LAUFEN opened a creative space for bathrooms in Madrid.

The interior concept was designed by Patricia Urquiola, one of the most renowned, award-winning, and versatile designers of our time.

The context of the new creative space, with an area of almost 200 square meters, is a historical villa from the early 1900s. Organised on two levels, this attractive space is reserved exclusively for architects and designers. Patricia Urquiola conveys the spirit of the Swiss company brilliantly and applies a sensitive approach.

## Individual solutions

The individual planning and design of bathrooms is a growing segment of the sanitary market. Architects and planners of high-quality private residences in particular, but also public and semi-public buildings, such as hotels, often require individual solutions that can be fitted precisely into the floor plans of sanitary rooms and bathrooms, in order to meet the special requirements of the client.

LAUFEN is adapting to these requirements with numerous solutions from its range of products and creating bathrooms made to measure:

These include, for example, washbasins, ceramic shelves, mirrors and bathroom furniture manufactured to the millimetre, but also colour or custo-

misation options. Even faucets can be individualised, and special handles, logos, colours, and surfaces can be provided as required.

**TAILOR-MADE SOLUTIONS CAN BE REALISED TO MEET CUSTOMER REQUIREMENTS**

In the meantime, modern solid surface materials are also available that can be used to realise individual customer requirements in the shortest possible time in small quantities. When it comes to washbasins, worktops, accessories, furniture, shower trays, bathtubs, sinks, and even wall coverings, there are almost no limits to creative drive.

This enables architects and designers to create their own designs that harmonise perfectly with the room and decor. LAUFEN also offers a complete service package, which includes feasibility checks, assistance with technical drawings, the manufacture of models and prototypes, the adaptation of accessories, direct shipping, and after-sales service.

**VARIETY OF SHAPES THANKS TO MINERAL MATERIALS**

# LAUFEN – THE PRODUCTION

## LAUFEN IN FIGURES

LAUFEN BATHROOMS AG IS A SWISS COMPANY SPECIALISING IN PREMIUM SEGMENT SOLUTIONS FOR BATHROOMS. THE HEADQUARTERS ARE LOCATED IN LAUFEN NEAR BASEL. MANAGED BY THE FAMILY-OWNED ROCA GROUP SINCE 1999 LAUFEN RUNS 7 MANUFACTURING SITES IN CENTRAL EUROPE, WITH 2500 EMPLOYEES AND SALES OFFICES IN 44 COUNTRIES.

## Sustainable quality

### WATERSENSE CERTIFICATION

LAUFEN's floor mount and wall hanging water closets have been certified to meet the rigid requirements of the WaterSense program. These products meet the WaterSense requirements for both minimal water usage and waste removal exceeding 350 grams. Frequently referred to as High-Efficiency Toilets (HET), LAUFEN's dual-flush technology is used throughout the product line to achieve its HET certification.

### IAPMO UNIFORM PLUMBING CODE

All of LAUFEN's ceramic products (unless noted otherwise in the price list) meet the design requirements and laboratory testing demands of the Uniform Plumbing Code (cUPC) and American Society of Mechanical Engineers (ASME). Organisations that provide this testing routine include the International Association of Plumbing and Mechanical Officials (IAPMO Group), that have issued several of LAUFEN's certifications.

### Economic water flush systems

LAUFEN's 4.5/3-litre/ 1.18/ 0.8 gallons toilets meet all functional requirements defined by international standards EN 997 Class 1 Type 5, EN 997 Class 2 and SAI/Wels 4 Stars.

Please take into consideration your local requirements that may vary from country to country.

Find further information in the chapter Product features and benefits.

### European water label

The database of the European Water Label provides architects, planners and

- LAUFEN branch
- Worldwide export

consumers with a comparative tool that is valid in the whole of Europe and that allows them to evaluate the water consumption of a water-using product in the bathroom or kitchen at a glance.

Find further information in the chapter Product features and benefits.

### Environmental protection standards

Environmentally friendly production of modern, durable and resource-saving products.

Since 1998, LAUFEN has continually monitored the use of resources in all its internal and external processes. Targeted measures and appropriate investments promote the efficient and sustainable use of manufacturing resources. Important key environmental protection indicators now clearly show that LAUFEN production sites fulfil the legally-prescribed environmental protection standards, and in most cases also exceed them.

### Certification

The first two LAUFEN production facilities were successfully ISO 14001 certified and EMAS registered in 1997. Both of these factories were awarded the European Environment Prize 2007 for exemplary environmental management. All the LAUFEN production facilities are now certified with the Environmental and Quality Management Systems ISO 9001 and ISO 14001.

### Swiss Quality

Products with the Q-Plus certification meet both the European standard and the established more stringent Swiss suissetec/VSA standard. LAUFEN sanitary ware products meet these Swiss quality standards and have been recommended for approval accordingly.

## Freedom to Reshape

### SAPHIRKERAMIK VERSUS FINE FIRECLAY

SaphirKeramik available on the market is the latest, globally significant innovation from LAUFEN.

This revolutionary, ceramic material reaches its exceptional hardness blended with corundum, a colourless mineral, which is a component of sapphires. This gives SaphirKeramik a flexural strength equal to that of steel. Yet it has the potential to be wafer-thin, giving designers almost infinite freedom to experiment – and tear up the rulebook of bathroom design.

After some years of experience of producing SaphirKeramik pieces on an industrial scale, LAUFEN is now stretching the patented material's limits by exploiting its super-fine forms not only to create exquisitely detailed textures and patterns but also by engineering the innovative material to increase its maximum size – a 120 cm-long washbasin in SaphirKeramik is the largest to date. LAUFEN has also applied its impressively efficient, high-pressure casting technology to, high-volume pieces in SaphirKeramik.

THE THIN-WALLED SAPHIRKERAMIK WAS TESTED FOR IMPACT RESISTANCE AT THE KERAMIK INSTITUT MEISSEN

Simultaneously hard and malleable, SaphirKeramik enables pieces to be made with very thin, yet very strong walls of only 3 – 5 mm, as well as with narrowly defined radii of only 1 – 2 mm. The slim profile of SaphirKeramik means that it saves space, is light and environmentally friendly. The new design characteristics of this innovative material are rooted in its exceptional hardness and strength.

### SAPHIRKERAMIK HAS A TWO TO THREE TIMES HIGHER BENDING RESISTANCE THAN TRADITIONAL CERAMICS

When the mechanical properties of the two traditional sanitary ceramic masses – namely vitreous china and fine fire clay – are compared, the performance of SaphirKeramik is unique even in international comparison.

The comparative values measured by the Federal Institute for Materials Research and Testing in Berlin (BAM) for SaphirKeramik are, at an average of over 120 MPa;

### PRODUCTION OF SAPHIRKERAMIK WITH THE CASTING TECHNOLOGY INVENTED BY LAUFEN

comparable with carbon steel and twice as high as for vitreous china. LAUFEN was awarded the Swiss Design Prize 2017/18 for the development of SaphirKeramik.

"Aspects such as ecology and sustainability may not have been the focus of attention in the development of SaphirKeramik, but they contribute significantly to the positive overall image of the material," the jury commented. In doing so, it acknowledged the additional advantages of the material: Lower material costs, for example, which are also due to a simplified structure of the ceramic parts, as well as the advantages in terms of environmental protection and sustainability, since fewer raw materials and less

energy are used in the firing, production, and transport of SaphirKeramik.

"New materials have always been one of the most important driving forces behind the development of design. With SaphirKeramik, the traditional Swiss brand LAUFEN has succeeded in creating an equally surprising and remarkable innovation whose effects on sanitary ceramics can only be estimated to a limited extent today."»

### BENDING STRENGTH MPa

Source: Bundesanstalt für Materialforschung- und Prüfung, Berlin, 2011

### IMPACT ENERGY Nm

Source: Keramik-Institut GmbH, Meissen, 2011

The composite material, which does not require chemical additives, wows with its specific properties - hardness, bending strength - and offers the enormous economic advantage of being suitable for processing using traditional production processes." These were the words the jury used to elaborate on their decision to award SaphirKeramik the Swiss Design Prize.

# LAUFEN – THE HISTORY

**1892**

It was on 4th July 1892 when the success story of the „Tonwarenfabrik LAUFEN“ started with the production of bricks and clinkers. The company was founded by three men: Albert Borer, Johann Spillmann & Joseph Gerster-Roth.

**1898**

Demand for earthenware increases to a volume that makes the construction of a second factory in LAUFEN necessary. The factory, which started production in 1898 was mainly used for the production of roof tiles and bricks as well as drainage pipes.

**1905**

A canteen is installed on the premises, where quality meals are offered for the workers at 40 cents.

**1924**

The acquisition of the Aktienziegelei Allschwil, the chimney production Allschwil and the brick factory Tranzer had a „positive impact on all brickyards in the LAUFEN valley“.

As a result, a third kiln is inaugurated. In the same year, the share capital of the „Tonwarenfabrik LAUFEN“ is increased to 1 Mio Swiss Francs.

**1925**

Under the directive of Guido Gerster, CEO and member of the supervisory board of the Tonwarenfabrik LAUFEN, the „Aktiengesellschaft für keramische Industrie LAUFEN“ is established on 26th November. Fire clay is introduced, which enables the company to produce washbasins and sinks.

**1931–1933**

An innovative porcelain-like material is launched under the brand name KILVIT. KILVIT is much stronger than fire clay and the pieces come out completely white and dense.

**1934**

A factory is built to produce wall tiles from stone ware. Thus turning the „AG für keramische Industrie“ into the first manufacturer of wall tiles in Switzerland and serving the national construction industry during the war years

**1938**

The production of wall tiles is followed by that of floor tiles. Another factory is built in LAUFEN to produce these floor tiles from stone ware. In a difficult business environment new jobs are created.

**1949**

After World War II, the Swiss Federal Railways, SBB, turns its attention to the electrification of the vast national railroad network. LAUFEN responds with the production of electro-technical porcelain – mainly insulators – and becomes a strong supplier of SBB.

**1952**

Within a short period of time, a new factory is constructed in Campo Largo, in the greater Curitiba region, by „AG für

keramische Industrie LAUFEN“ to also manufacture wall and floor tiles in Brazil. The company is registered under the name of INCEPA S.A.

## 1967

LAUFEN acquires the Vienna-based OESPAG (Österreichische Sanitär-Keramik und Porzellanindustrie AG) with its two Austrian production sites in Gmunden and Wilhelmsburg.

## 1970

The „Keramik Holding AG LAUFEN“ is founded in response to the organisational structure needed to successfully guide the 4'000 employees at various locations in Switzerland, Austria, Germany, Spain and Brazil.

## 1971

The progressive development of the company necessitates new headquarters. The appointed architect is Giuseppe Gerster, a grandson of Joseph Gerster, who once founded the company.

## 1973

„On Saturday 3rd August shortly before 3:00 p.m. a fire had broken out in the floor tile factory belonging to the Tonwarenfabrik LAUFEN AG. It emanated from the oil burner at kiln I. Despite the quick reaction with fire extinguishers, the fire was able to spread out, thus destroying the plant to a great extent.“ [Extract from the media]

## 1982

Ceramic pressure casting, developed by Keramik LAUFEN over years, is unveiled to the public for the first time in October 1982. A process which sets new standards for the sanitary industry, it enabled LAUFEN first to significantly boost its capacities, its efficiency as well as its range.

## 1986

Issue of 140 000 share certificates at 650 SFr each.

## 1990

LAUFEN focuses increasingly on design. Porsche Design is the first internationally renowned name to be consulted.

## 1997

From 1992 to 1997, the company went into debt through acquisitions and embarked on the restructuring of the group which had been due for years.

## 1999

LAUFEN becomes part of the ROCA group, and thus belongs to one of the largest and most influential enterprises in the bathroom and sanitary ware industry.

## 2002

In 2002 LAUFEN launched 'Tam Tam', the world's first standing washbasin, cast in one piece.

The washbasin belongs to the design line ILBAGNOALESSI One by Stefano Giovannoni.

## 2009

The LAUFEN Forum opens its doors. In addition, the Similar headquarters and production facilities are relocated to LAUFEN. This was the last step in the creation of the Swiss competence centre for bathroom culture in LAUFEN.

## 2013

With the innovation of „SaphirKeramik“ LAUFEN presents a groundbreaking world novelty and sets a new standard for bathroom design.

Keramik LAUFEN celebrates its 125th anniversary.

IL BAGNO **ALESSI** One  
Design by  
Stefano Giovannoni

# ILBAGNOALESSI ONE

Italian architect and designer Stefano Giovannoni breaks out. From the repetition of form of room geometry, which only ever produces the same templates. He leaves worn stereotypes behind and combines the extraordinary with the popular. Well-known structural frameworks suddenly evoke irregular, subtle associations that dissolve the principles of perception and open up new spatial worlds. However, the newly conceived contours of the Italian architect and designer are not only reflected in the first complete bathroom scenario for ILBAGNOALESSI ONE. They are also knighted by the exhibition in the permanent collections of the Centre Georges Pompidou in Paris and the Museum of Modern Art in New York.

PALOMBA  
COLLECTION

Design by  
Ludovica+Roberto  
Palomba

# PALOMBA COLLECTION

Water, as a source of life, represents the source of inspiration for Ludovica and Roberto Palomba. This was noticeable with all senses when the successful PALOMBA COLLECTION from LAUFEN was launched. The intensive connection with the fluid and sparkling element finds its definition in the formal language, which the famous Italian designer duo describes with the expression „fingerprint of nature“. The tension between strict geometry and organic form characterises the entire collection and ensures that all pieces come closer together. In the extension of the PALOMBA COLLECTION, soft, organic lines present themselves as harmonious elements that also enable the most demanding bathroom designs.

Ludovica+Roberto  
Palomba

# KARTELL BY LAUFEN

Ludovica and Roberto Palomba continue to play off the strengths of the Kartell by Laufen range of icons with the greatest of ease, lending physical form to the endless options available by combining colours, forms and surfaces. New washbasin creations of this design classic in an extremely compact form and created from revolutionary SaphirKeramik. For your own freedom in bathroom design. For decisions with sense and feeling. For an unparalleled amount of space. For tangible quality that leaves nothing to be desired.

# LIVING SQUARE Design by Andreas Dimitriadis

# LIVING SQUARE

Andreas Dimitriadis takes ceramic feasibility to its limits. The designer lives the DNA of each project and creates a stylised rhythm that finally unfolds in its finest form in LIVING SQUARE. Extremely flat elements with their flat surfaces and defined edges literally float in front of the wall bearing witness to an unparalleled fusion of elegance and bathroom culture. Large areas are cleverly hidden behind narrow silhouettes defining a functional wash place as the centre of the bathroom.

# LIVING SAPHIRKERAMIK

LAUFEN opens up new perspectives. It breaks up the traditional scope for bathroom design and, since the invention of SaphirKeramik, allows us to look deep into a new era of form design. LIVING SAPHIRKERAMIK makes full use of the accurate characteristics of this revolutionary material and sets new standards with strict lines and tightly defined edge radii, which find their perfection in finely coordinated furniture combinations.

LIVING CITY  
Design by  
Phoenix Design

# URBAN AND MODERNISTIC

A system with corners and edges yet so flexible and easy to maintain: LIVING CITY has a clear concept and clear forms. The modular system offers wash-basins with and without shelves in many widths. Reduction and individualism without peculiarity: LIVING CITY's formal language is aimed at people who love a contemporary setting and design their surroundings with sensitivity and great sense for materials.

INO  
Design by  
Toan Nguyen

# INO

Toan Nguyen does not allow himself to be locked up. He loves expansiveness. Both mental and physical. This is also reflected in the new bathroom collection, which the French designer has designed for LAUFEN. Immaculate objects with simple lines and delicate yet extremely stable walls conjure up an elegant, inviting and almost weightless look. A new interpretation of classic forms which not only touches the hearts of hard-line purists.

VAL  
Design by  
Konstantin Grcic

# VAL

A material that offers new possibilities, a Designer, who pursues new ways, a connection that creates new worlds. For a bathing experience that awakens unknown emotions. With his evolutionary designs, Konstantin Grcic architecturally stages the revolutionary SaphirKeramik from LAUFEN, thereby completing the bathroom collection VAL. Clear geometric lines, extremely narrow edges and finely textured surfaces united in harmony, open up a unique category of bathroom culture.

 SaphirKeramik

VAL

## NEW WASHBASINS / ACCESSORIES / TOILET

Good design picks up the trends of the age – great design sets their tone. And when one of the greatest designers of our time dares to address the most pivotal room of the home, a breath of fresh air is the inevitable result. The designs of Konstantin Grcic rethink the proportions of bathrooms and are flexible and dynamic. They are concise artistic elements which necessitate no compromises in use as a result of their clever design.

PALACE  
Design by  
Andreas Dimitriadis

# PALACE

Design is not an end in itself. It is here to serve. Andreas Dimitriadis provides PALACE with humanity and authenticity. He gives each form a clear function, generates a strong emotional attraction in addition to clearly visible benefits. As a timeless classic, designed for the future, PALACE demonstrates its unique strength with cuttable washbasins. Dimitriadis' homage to ceramic as a material thus enables a tailor-made room design that previously seemed impossible.

# LAUFEN PRO Design by Peter Wirz

# LAUFEN PRO

With lots of sensitivity Peter Wirz brought about a systematic, production-optimised evolution of the PRO concept: Thanks to its slim silhouette and clearly-defined radii, the washbasin has a light and elegant, appearance. The deep bowl means that it's also functionally appealing. The aesthetics of LAUFEN PRO therefore definitely take the range in the direction of LAUFEN's premium design lines – while remaining affordable by all.

# FLOORSTANDING WATER CLOSET BOWLS

## FLOORSTANDING WATER CLOSET BOWLS

Hygienic and practical. These toilets are often referred to as 'masterpiece' as their shape, often in one single cast, makes them difficult to produce. Their siphonic action means water and waste are vacuumed out, which makes them very efficient.

# WALL-HUNG WATER CLOSET BOWLS

# WALL-HUNG WATER CLOSET BOWLS

Mounting a toilet on the wall not only makes it appear more elegant, but also gives lightness to the room. The practical advantages should not be underestimated: easier cleaning of the floor and thus a higher degree of hygiene also speak for these modern WCs.

# BOUTIQUE

## DESIRE - THE MEASURE OF ALL THINGS

No furniture series could enhance a bathroom more surprisingly. In the BOUTIQUE range, the highest quality materials and wood finishes have been strategically selected with great care and technical finesse to ensure they meet the needs of the most discerning customer. Here, the characteristics of the trend-setting SaphirKeramik are reflected in the fine design language. Narrow, tapered edges provide perfectly shaped storage space in the bathroom which harmonises immaculately with the fine washbasin shapes. The crowning glory is the user-friendliness of the sophisticated design with seemingly incidental, intelligent technical solutions.

# BATHTUBS

## SENTEC BATHTUBS

The force of nature is unexpectedly conjured up in a solid surface bathtub. With the high proportion of mineral particles, the surface feels as smooth as stone which has been rounded and polished over time by gently flowing water.

The pleasant, warm touch of the surface conveys a feeling of health and cleanliness - providing pure relaxation.

## MARBOND BATHTUBS

Marbond is a robust composite material from LAUFEN, made of two layers with a high-strength bond between them. It is based on a high quality solid surface material with a robust gel coat finish.

# URINALS

# UNLIMITED POSSIBILITIES

With urinals, design, comfort and hygiene are combined to a single unit, which has virtually no limits to where it can be installed. Whether it be in the catering sector (restaurants, bars and hotels), stations and airports, businesses, public buildings such as schools and congress centres, or shopping centres, cinemas, theatres or concert halls – these urinals, most of which are equipped with electronic flushing, can be used virtually anywhere.

LAUFEN urinals are revolutionising the upkeep and maintenance of public sanitary facilities. Up till now, urinals often had to be completely disassembled when replacing their siphons. LEMA allow you to release and pull the siphon out easily using a special key.

The siphon on LEMA urinals can be changed easily, quickly and economically:

1. Remove ceramic cover by hand.
2. Lift siphon up and out using special key.
3. Clean urinal and rinse pipes.
4. Insert the new siphon.
5. Place ceramic cover.

LAUFEN FAUCETS

# FAUCETS

## LAUFEN stands for Quality & Design

DESIGN AND DEVELOPMENT

The company provides complete solutions for bathrooms right around the world.

TOOL-MAKING SHOP

## Expertise in faucets – since 1854

Very aware of the power and significance of water as an element, LAUFEN is committed to true aesthetic beauty: We give water a shape to enable it to pamper body and soul.

CASTING SHOP

In 2007, ROCA acquired the oldest faucet factory in Switzerland – Similor AG – and since then has been a subsidiary of LAUFEN. This has enabled the company to complete its product range as a complete bathroom provider. For the last 160 years, the employees have drawn their inspiration from the element of water, and their endless stream of innovations turn bathroom faucets into an artwork form.

MACHINING (CHIP-CUTTING) SHOP

## From hot ideas to cool faucets

GRINDING SHOP AND POLISHING SHOP

What takes place during the concept and planning phases, and what often heats heads to steaming point, gains its ultimate expression at temperatures approaching 1000 degrees Celsius. Production is now in progress, launching the history of a new faucet. Beholding beauty at all times, we accompany it from station to station, until it achieves its ultimate form.

SURFACE TREATMENT SHOP

FUNCTION TESTS

And at the place where ultra-modern machines reach the limits of their capabilities, that's where we encounter art once again: in the faucet finishing shop. Because pure craftsmanship is what people want.

FINAL ASSEMBLY AND PACKAGING

# Kartell by LAUFEN

## INNOVATIVE AND RICH IN EMOTIONS

An architectural project that speaks a new language. Kartell by LAUFEN is the synthesis of the work which Ludovica + Roberto Palomba have created in recent years in the world of bathrooms and represents an important progress in this area.

# PRODUCT FEATURES AND BENEFITS

# SANITARY WARE

## Sanitary ware production: Tradition and innovation

The basic ingredients for making ceramics have always been naturally occurring raw materials: Kaolinite, clay, feldspar and quartz sand form the basis for this extremely durable and hard material. The individual components of this malleable material are combined, homogenised and cleaned as part of a unique and very protracted process at LAUFEN. The resulting slurry – the pourable starting material for ceramics – is poured into pre-prepared plaster moulds or shaped using a special pouring process developed at LAUFEN.

The formability and pourability of the material allows the creation of a wide variety of sanitary ware products, but nevertheless always poses a manufacturing challenge, especially when creating objects with complex geometries.

Dried and glazed blanks are then baked in a kiln at temperatures up to 1240°C. Such extreme kiln temperatures ensure the hardness and durability of our high-quality LAUFEN products.

Ceramics, through their smooth, easy-to-clean surface, fulfil the highest hygiene standards – chemical acids, strong cleaning fluids or hydrochloric compounds hardly affect the material. Due to its light fastness, versatility and pleasant appearance, ceramic is the most popular material used to manufacture high-quality sanitary fittings.

## Top recycling qualities

Ceramic is the oldest malleable material used by mankind – and consists exclusively of naturally occurring raw materials. Ceramic is 100% recyclable and can be reintroduced into production processes as a ground powder or reused as a valuable raw material in other industries.

## Ceramics or synthetic materials

Ceramic is the material which has been traditionally used in the bathroom over the centuries – and with good reason. The superiority of the material is evident, particularly in terms of hygiene, useful lifetime, environmental compatibility and durability. However, washbasins made of plastics and mineral-based cast materials are also available on the market, which present a design challenge to producers of sanitary ware. LAUFEN has always had a reputation as an innovator in the sanitary sector and is always striving to

improve the materials and production techniques it uses. As a result of these efforts, new ceramic compositions have been developed that allow smaller tolerances and even more precise corner radii or large flat ceramic items. Made to measure washbasin solutions ensure that ceramic sanitary ware can be fitted with millimetre precision into bathroom floor plans. Ceramics therefore deliver outstanding performance in all respects

 SaphirKeramik

## A revolution in the formal language of ceramics

The innovative and high-quality composition of SaphirKeramik bestows possibilities and versatility never seen before upon the base material, enabling exceptional shaping. Edge radii of 1–2 mm are thus technically feasible. The new type of ceramic is considerably harder and has an improved bending strength. LAUFEN is thus able to produce thinner ceramic bodies, which reduces weight and the consumption of raw materials and energy. SaphirKeramik is not a replacement for any of the existing materials; instead, it broadens the range of forms of expression of the natural base material.

## LAUFEN EasyFit

LAUFEN has developed a revolutionary wall fixation system for WCs, bidets and urinals. A patent has been lodged. The invisible, easy to mount fixation system meets the needs of both fitters and end users.

For example, end users are impressed by a ceramic WC with a flawless surface which is really easy to clean since there's nowhere for dirt to hide. Fitters are enthusiastic about the time-saving, intuitive mounting system

## Comfortable lowering system

Thanks to our convenient **lowering system** many of our WC covers and seats close gently and quietly. For easier cleaning, all LAUFEN seats can be removed with a simple hand movement. LAUFEN seats have been comprehensively tested: amongst others the test includes opening and closing 50,000 times.

## Vario Outlet

**MAXIMUM WALL CLEARANCE FOR VERTICAL FLOOR OUTLET FOR 12 INCH ROUGH IN**

**HORIZONTAL WALL OUTLET**

The installation dimensions of WCs are not always identical:

In many renovation situations the LAUFEN Vario outlet can make it easier to connect the WC to the sewage network. Both horizontal and vertical outlet wall clearances of up to 305 mm / 12 inch for washdown are possible.

## Without flushing rim

Most of the bowls of the new LAUFEN WCs are rimless. There's no longer anywhere for dirt and deposits to hide; instead, thanks to an innovative and powerful flushing system, everything's flushed cleanly away with both the 6/3-litre version and the 4.5/3 litre version. Both public toilets and private bathrooms can benefit from the easy cleaning and great hygiene of this system.

## Water saving WCs

The latest generation of LAUFEN water-saving WCs are optimised to a full flushing volume of 4.5 litres (1.18 gallons) of water. Compared to today's 6/3 litre (1.6/ 0.8 gallons) Dual-Flush these models provide substantial water savings. With an average of 5,000 flushes per WC per year, the yearly water saving is at least 6,000 litres, or more than 27,000 litres if we take into consideration that 9 or even 12 litre models are still in use. LAUFEN WCs marked with the green 4.5/3L logo are not only fulfilling the requirements defined in the harmonized standard EN 997 Class 1 Type 5 and Class 2 (that cover the whole European territory), but also fulfill the challenging Australian requirements of SAI/Wels 4 Stars.

For Laufen the European water label is the most reliable and transparent way for consumers and professionals to clearly appreciate the potential regarding the reduction of water consumption. LAUFEN toilets, cisterns and urinals are developed to reach the highest level of water saving performance. Please note that a suitable downstream drainage system must be built for this kind of water-saving WCs. In case of restrictions of the existing drainage system or local regulations LAUFEN WCs marked with green 4.5/3L logo can also be flushed with standard 6 litre flushing volume.

### IAPMO UNIFORM PLUMBING CODE

All of LAUFEN's ceramic products (unless noted otherwise in the price list) meet the design requirements and laboratory testing demands of the Uniform Plumbing Code (cUPC) and American Society of Mechanical Engineers (ASME). Organisations that provide this testing routine include the International Association of Plumbing and Mechanical Officials (IAPMO Group), that have issued several of LAUFEN's certifications.

## Flushing mechanisms

The flushing mechanism is the heart of every cistern from LAUFEN. In order to exceed current standards, the engineers of the Swiss bathroom specialist set themselves the highest quality goals during their extensive development programme.

This is also confirmed by the certifications e.g. by LGA and Q Plus. During development it was ensured that the flushing mechanisms were prepared for future development and were completely backwards compatible. Replacing "old for new" is thus no problem for sanitary technicians. The water supply options also offer flexibility, as they can be attached at the side, at the rear or from below.

The love of detail is proven by the elegant, independent design of the chrome-plated flush mechanism. The flushing mechanisms are produced completely within the European Union. Spare parts management and service are fully undertaken by LAUFEN.

## Bathtub and shower tray materials

When choosing the bathtub or shower tray, material choice depends on individual preference and intended use. In order to be able to provide the right solution for all situations, LAUFEN provides four different materials:

### Sentec

Bathing in a bathtub made of solid surface material Sentec feels like being in a natural basin. Due to a high percentage of mineral particles, the surface feels smooth. The innovative material also allows an incredible freedom of design: almost every shape is feasible – from very organic to very straight and architectural. Furthermore the non-porous surface of the material is hygienic, durable, UV-resistant, highly resistant to scratches and can be effortlessly cleaned.

### Marbond

Marbond is a composite material made of two layers which are extremely well connected with each other: The basis is formed by a high-quality mineral casting material, the surface is coated with a two millimetre thick acrylic layer. Marbond is hygienic, easy to clean, temperature resistant according to EN 263 and anti-slip (class C).

# FURNITURE

## Furniture surfaces

Furniture surfaces in the bathroom are designed to deal with the room's special climate conditions. LAUFEN provides a range of different surfaces, all optimised for their intended use and come with a guaranteed long useful life.

### Real wood veneer

A cosy bathroom in wood. The classy wood veneers provide the haptics and optics of real wood. They are resistant to moisture and equipped with reinforced edges, making them resistant to impacts. These real wood veneers include those used in Boutique and ILBAGNOALESSI One 'noce canaletto'.

### HPL

HPL (High Pressure Laminate) surfaces are suitable for heavy use and are exceptionally durable, even with the look and feel of wood. They are easy to care for and clean, they are light-resistant and odourless and not sensitive to alcohol, organic solvents and water. HPL coatings are used by LAUFEN for the Space series.

### Painted furniture surfaces

Our classic high-gloss paint finish, using two-component water-resistant paints, offers perfect surfaces with no unevenness and a wide range of colours. LAUFEN painted surfaces include the ILBAGNOALESSI One white furniture.

### Film coatings

Film coatings are pulled over corners, thus ensuring the furniture surfaces are joint-free and not sensitive to water. They are scratch, water and light-resistant. Their flexibility offers a great deal of design freedom in terms of the forms used, such as integrated handles, for example. LAUFEN uses film coatings in its Living Square, and Case ranges.

## Storage systems

Tidy storage systems in drawers of the ILBAGNOALESSI One, Boutique and Space for VAL bathroom furniture range ensure tidy storage and prevent the return of chaos every time a drawer is closed fast.

## Soft close

Slamming of doors is not inevitable: At LAUFEN, soft close means gently-closing furniture doors and drawers. The system is integrated as standard into all LAUFEN furniture. In this case, quality can be felt and not heard.

## 3D mounting system

Comfort in every detail: The flexible and adjustable 3D mounting system makes installation LAUFEN furniture on the wall quick and easy.
